

docu tools is an internationally operating company with its headquarters in Vienna, Austria. We develop and market the software docu tools for innovative cloud-based construction documentation, defect management und task coordination in 21 languages.

We have a vacancy at our HQ in Vienna for a skilled software developer with experience with js, preferably React, but mostly a solution-oriented person who is curious and never stops learning.

Technical opportunities and challenges

User experience is at the centre of our concerns and we are always improving our product's look and feel. Our designers do an awesome job, which Development has to implement using the ever increasing power of React to provide a satisfying and fast experience using docu tools.

Things you'll work with

- Progressive Web Application/Trusted Web Activity
- React
- Redux-saga
- React-router
- Styled-components
- Express
- Service worker
- Pouch DB
- Working on Backend Microservices

Your profile

- Excellent communications skills
- Fluent command of English
- Interested in facing the challenges of the still widely undigitalized construction industry
- Located in Vienna or willing to move (we help with the paperwork required)

Our Benefits

- Extremely motivated team having lots of fun at work
- Highly autonomous and flexible work
- Free drinks and snacks
- Air-conditioned office in Vienna's city centre
- Annual gross salary of minimum EUR 50,000

For legal reasons we point out that the annual gross salary for full-time employment according to Austrian wage agreements is at least EUR 33,600.

We are looking for dedicated people who love to take responsibility for their actions and help us stay the market leader,

We are looking forward to your application!

[Alexander Partsch](#), Head of Development
