

# Frontend iOS Developer – Junior to Midlevel (f/m/d) at docu tools

- > VIENNA, AUT or REMOTE
- > ENGINEERING
- > FULL-TIME

## About us

docu tools is a rapidly growing, innovative SaaS product to manage construction projects of all kinds. Over **23.000 projects** with over **500.000 construction plans** and **5.700.000 photos** are stored and managed with docu tools by over **5.000 monthly active users**. Developed and distributed by **DDS Digital Documentation Systems GmbH** the software has been around since 2008 and is available in 27 languages.

Join the docu tools team to design, plan and implement innovative new features using cutting-edge technologies for the construction industry. Be part in fulfilling our mission to create tools that make large-scale construction projects more sustainable, effective and transparent.

You will closely collaborate with our product owner, UI/UX designers, backend and mobile developers together with two other web frontend developers. We're maintaining one iOS app and a couple of component libraries, composing the docu tools iPad/iPhone app.

## Your mission

As an iOS dev at docu tools, you will mainly design, plan and develop new features and maintain the existing code base in form of bug fixing and refactoring. You have to collaborate with our UI/UX designer, product owner and backend team. Since this is a junior to midlevel position, we know and understand that there must be time & place for you to strengthen and grow your skillset. We will create an environment for you to learn, try out new things and sometimes fail and try again. We expect you to take on that opportunity we offer and prosper with it.

### About the team

- ✓ We are a young and international team (from Austria, Bulgaria, France, Sri Lanka and Brazil).
- ✓ We are passionate about design, user experience and technology. We do not build to sell but sell to build products our customers love to use on an everyday basis.
- ✓ We don't want to become the software company where people burn out. Possibility for home/remote office, flexible work times, extra support during hard times and a general focus on a good work/life balance are a main focus to us.

### What you'll do

- ✓ Technically design, plan and implement features for docu tools iOS app
- ✓ Create maintainable and scalable code optimised for robustness, reliability and performance
- ✓ Write and maintain unit tests so that the adherence to the functional requirements and quality of the productive code is guaranteed
- ✓ Work on bug fixing and improving application performance
- ✓ Participate in grooming sessions, design discussions and roadmap meetings

### What we're looking for

- ✓ Experience with iOS/Swift, modern swift frameworks and libraries and some SwiftUI
- ✓ Background in integrating REST APIs into mobile apps
- ✓ Knowledge of OOP paradigms, component models and understanding of UML diagrams
- ✓ Ability to work both independently and as part of a team

### What we offer

- ✓ Competitive salary
- ✓ Learning and development budget/possibilities
- ✓ Flexible working hours
- ✓ Latest hardware
- ✓ Beautiful office with huge garden in Vienna's 19<sup>th</sup> district
- ✓ Possibility of remote work (you'll have to provide your own garden though)
- ✓ German classes
- ✓ Gym at the office
- ✓ Our employees are our most valuable asset, which is why we develop individual models for market- and success-oriented payment. The absolute minimum salary under the collective agreement (IT-KV 2022) for this position is € 35.784/year.
